***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-28, drawn to an illuminated sign, classified in class 40, subclass 544.
- II. Claims 29-33, drawn to a carrier for a light engine, classified in class 362, subclass 249.

The inventions are distinct, each from the other because of the following reasons:

Inventions group I and group II are related as combination and subcombination.

Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed. The subcombination has separate utility such as the carrier having a mounting and optical surface, parallel mounting tracks and a central channel having a floor, sidewalls, a first and second ledges.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
